

Western Australia has new cyclone warnings.

We're no longer using the old blue, yellow, red alert system.

ADVICE

An incident is active.
Be aware and keep up to date.

WATCH AND ACT

There is a possible threat.
Take action now to stay safe.

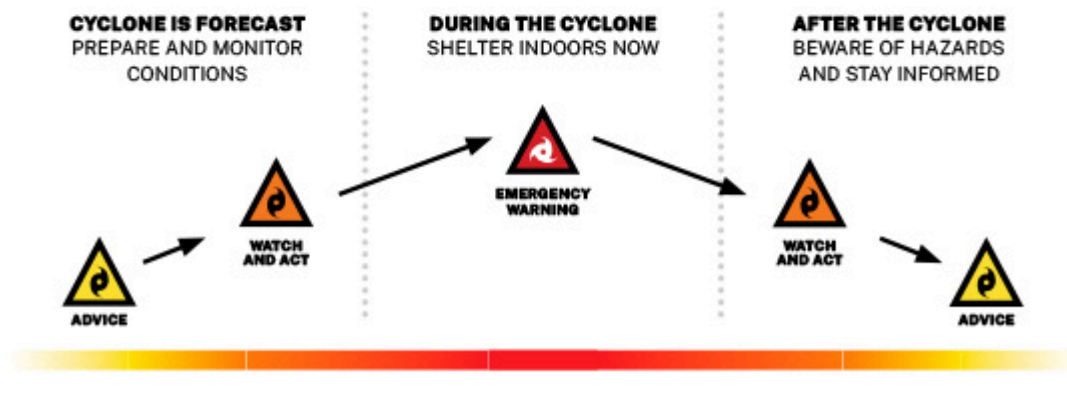

EMERGENCY WARNING

There is a threat to lives and homes.
Take immediate action.

UNDERSTANDING THE NEW WARNING SYSTEM FOR NATURAL DISASTERS

There are three warning levels which move up and down to reflect the risk to your life or property before, during and after a natural disaster. These are the same warning levels used for bushfires. The warning level will be followed by an action such as "Monitor Conditions" or "Shelter Indoors Now" giving you clear information about how to stay safe. Learning these three levels and how to respond to them could save your life.
